

## Precise, reliable and automated – Schenck Process Port Technology

### **Our precise weighing, bulk material handling and automation solutions**

- ◆ A faster material flow means greater productivity
- ◆ Fewer losses and better checkability of material quantities
- ◆ Faster ROI
- ◆ Unique product range in weighing and feeding technology, bulk material handling and automation
- ◆ Focus on optimum handling of a wide range of materials

Like you, we understand that the key task in all logistic processes is to make the desired goods available in the correct quantity and quality at the agreed time and place. For domestic and sea ports all over the world, these requirements are especially important.

Schenck Process is your expert partner in this area. With more than 125 years of experience, we supply a multitude of solutions for a wide range of applications in bulk material and container terminals. Our expertise is evident not only in our wide range of tried-and-tested components but also in system parts and complete solutions tailored to your specific requirements.
