

## High capacity output or low emissions. Why should you have to choose?

Innovative solutions for efficient and environmentally friendly power generation.

weighing  
feeding  
screening  
automation

Schenck Process is a world leader in all areas of measuring and process technology, offering solutions for weighing, feeding, screening and automation.

### Our solutions for coal-fired power plants, combined heat and power plants and associated industries

- ❖ Integrated systems and feeding packages for alternative fuels/biomass
- ❖ Gravimetric coal conveyors for efficient boiler operation and reduced emissions
- ❖ High-accuracy feeding technology for flue gas treatment and reduced additive consumption
- ❖ Control systems for electrostatic precipitators to increase filter efficiency

**We are looking forward to seeing you!**  
at VGB Congress Power Plants 2010,  
22. – 24. September in Essen, Germany  
**Booth 3.0 – 126**
